Trump is a direct threat to our republic. He has trampled on the Constitution and the rule of law, committing multiple abuses of power, including:

- 👑 **Waging an illegal and unconstitutional war** against Iran.
- 👑 **Refusing to divest from his business interests around the world**, accepting payments, in violation of the Foreign and Domestic Emoluments Clauses of the Constitution, and **exploiting the presidency to pocket an estimated 1.4 billion dollars.**
- 👑 **Attacking the federal judiciary**, fueling threats of violence against judges, and defying multiple court orders from federal courts across the country.
- 👑 Allowing the US Justice Department to **obstruct access to the Epstein files to protect himself and his friends.**
- 👑 **Turning government agencies into partisan forces** that serve his interests and not those of the American people.
- 👑 **Turning ICE into a private army** and unleashing it against the American people.
- 👑 **Engaging in a pattern of pardons to dangerous and powerful criminals**, many of whom have spent millions of dollars in support of Trump's political and business interests.
- 👑 **Imposing illegal tariffs**, raising costs for ordinary Americans.
- 👑 **Keeping thousands of people in inhumane internment camps.**
- 👑 **Threatening to execute Members of Congress.**
- 👑 **Threatening to cancel the 2026 congressional elections** and to suppress the voting rights of millions of citizens across the country.
- 👑 **Sending occupying military forces to American cities.**
- 👑 **Attacking the First Amendment** to silence citizens, protesters, elected officials, the free press, and law firms.
- 👑 **Illegally sending immigrants to corrupt, authoritarian countries**— and paying those countries millions of dollars to imprison them.
- 👑 **The list goes on.**

The congressional power of impeachment is designed to address this tyrannical threat to our democracy. Members of Congress must abide by their oath to protect and defend the Constitution and impeach and remove Trump from office.
